ARAB HOSPITALS FEDERATION

Certificate

OF GOLD INITIATIVE

THE ARAB HOSPITALS FEDERATION PROUDLY LAUNCHES THE 3RD GOLD INITIATIVE CERTIFICATE FOR SMART HEALTHCARE FACILITIES...

INTRODUCTION

After the success of the two previous Gold Initiative Certificates that aimed to build trust in our Healthcare sector especially during COVID-19 , The Arab Hospitals Federation launches today the **Gold Initiative Certificate for Smart Healthcare Facilities** to recognize and acknowledge the Institutions that best avail themselves of the most advanced technologies to improve patient outcomes, offer high quality services and reduce costs.

The Arab Hospitals Federation will again appreciate the efforts of Healthcare facilities, institutions and providers that were pioneers and distinguished in Healthcare transformation to advance Health in Arab Countries.

Digital Health transformation that makes hospitals "smarter" has become a big differentiator in most health care markets during the crisis. Fueling this new trend is a growing and aging population, rising expectations on the part of patients for access to high-quality care and improved customer experiences and increasing pressure to contain skyrocketing health care costs. Technology is not only the best way for hospitals to achieve these goals, it may be the only way.

The Gold Initiative Certificate for Smart Healthcare Facilities is addressed to Organizations (Health authorities, Hospitals, Primary Healthcare centers, Academic Bodies, Companies,...) that incorporated Innovative technologies and were leaders in their use of AI, Robotic surgery, Digital Imaging, Telemedicine, smart buildings, information technology infrastructure , HIS and EHRs.

As per Steve Jobs – “Innovation is the ability to see change as an opportunity not a Threat”, We admire the Healthcare facilities that implement breakthrough technologies to provide better and enhanced patient care.

We look forward to discover how your facility uses emerging medical technologies able to change the life of thousands of patients!

Through this certificate, we aim to appreciate organizations that have constantly proved model performance. The winning Organization will receive a reputable “Gold Initiative certificate” to recognize the efforts of Healthcare facilities in using Technology to improve health outcome, reduce cost or to enhance quality services. The “Gold Initiative certificate” aims to offer an effective platform for Healthcare facilities to expose their capabilities and identify the pioneers within the industry.

It will shed the light on these Organizations through an extensive exposure for all leaders, Stakeholders, Healthcare workers, in addition to the community as a whole.

A booklet for the project will be published at the end including all our partners, collaborators, supporters and winners...

DATE OF SUBMISSION

Submission of applications begins on September 15, 2021 and ends on November 1, 2021.

The finalists will be notified on November 16, 2021.
